

Title	Name	Workplace
Decision making with and without description for outcomes in the Iowa Gambling Task: Dominance of processing feedback	Akiyama&Hasegawa	Kobe Gakuin University
An EEG investigation of intuition in decision making using backwardly masked emotionally expressive faces as nonconscious cues.	Baker et al	University of Gloucestershire
Do decision-making styles help to explain university students risk behaviour in addition to basic personality factors and self-regulation?	Bavolar	PJ Safarik University, Kosice, Slovakia
Intelligence Analysis: Does Collaborative Analysis Outperform the Individual Analyst?	Dhami	Middlesex University, London
The Influence of Complexity and Cognitive Architecture on the Occurrence of Cognitive Biases in Real-Life Decisions	Domeier&Sachse	University of Innsbruck
The Effect of the Direct and Displaced Emotion on the Socio-Economic Decision Making: the Prisoner's Dilemma	Eimontaite et al	University of Hull
Compensating for Age-Related Decline in Decision Making: A Computational Modeling Approach	Fechner et al	Max Planck Institute for Human Development
The Games Economists Play. Economics students differ from other students in the way they construe and decide in games.	Gerlach	Max Planck Institute for Human Development
Growth and Decline of Assets: On Biased Judgments of Asset Accumulation and Investment Decisions.	Gonzalez&Svenson	Stockholm University
Directionality of probability phrases is not determined by their linguistic head	Gourdon-Kanhukamwe	Kingston University
Saving energy when others pay the bill: Behavioral field experiments in student housing	Griffioen&Handgraaf	Wageningen University
The effect of risk type on perceptions of graphically-presented risks	Heard&Rakow	University of Essex
An eye-tracking study of the decision-making and reasoning process	Ideno et al	Keio University
Beyond Replication: Understanding the Psychological Space of a Phenomenon	Barkan	Ben-Gurion University of the Negev
Ethical decision making in counterfeit purchase situations	Jaeger&Martinez	Nova School of Business and Economics
Exploration-exploitation analysis of social learning strategies	Barkoczi&Galesic	Center for Adaptive Behavior and Cognition, Max Planck Institute for Human Development
The benefits of structuring decisions	Bosker et al	Radboud University, Nijmegen
A general self-anchored model of comparative judgment	Konovalova&Le Mens	Universitat Pompeu Fabra
Why do individuals avoid potentially life-saving risk information?	Kos et al	University of Michigan
Are the Poor Worse at Dealing with Ambiguity	Li	Erasmus University
Comparison of Group and Individual Decision Making Behavior	Manthei	Alpen-Adria Universität Klagenfurt
Beyond Shannon entropy: a unified mathematical framework for entropy measures and its importance for understanding human active learning	Crupi et al	University of Trento
Pay More – Save Less: The Paradoxical Time-Saving Bias in Consumers' Choice	Peer	Bar-Ilan University
Shortcut to health: using process tracing to analyse product search and purchase decisions of organic food	Pekovic et al	Leeds University Business School
How is risk reduction reported in surgery journals? On the effect of denominator neglect	Petrova et al	University of Granada
Repeated choice in dynamic decision tasks: How much information can, should, and do, decision makers use?	Rakow et al	University of Essex & King's College London
Everybody will win, and all must be hired: Comparing additivity neglect with the nonselective superiority bias	Riege&Teigen	Department of Psychology, University of Oslo
Donations to identified and unidentified recipients: The role of incidental mood and general life satisfaction	Sabato&Kogut	Ben-Gurion University of the Negev
Speed-accuracy tradeoff in learning to solve working memory tasks	Ez-zizi et al	University of Bristol
Numeracy levels and survey response biases: Low numeracy group responded with fewer categories in the survey.	Hirota	Tokyo City University
Predicting Risk-Taking Behavior in a Real-Life Traffic Task	Schurmann et al	University of Basel
The construction of preferences: how far does effect of evaluative conditioning extend?	Shevchenko	Mannheim University, Germany
Did you check the calories? The Influence of Weight Control Motives on Food Choice Processes	Suess&Scherndl	University of Salzburg
Cognitive Strategies when Integrating Mutually Dependent Probabilities	Sundh	Department of Psychology, Uppsala University
Differences in Risk Perception between Residents of Tokyo and Fukushima	Tamari et al	The University of Tokyo Hospital
Investigation of an alternate form of the Cognitive Reflection Test	Thomson&Oppenheimer	University of California, Los Angeles
Embracing chance tactically: A different perspective on risk taking	Tykocinski&Ayal	Interdisciplinary Center (IDC) Herzliya
How strong is your bias? Influence of in-group trust bias on learning in the Trust Game.	Vermue&Sanfey	Behavioural Science Institute
Does consulting with others influence judgments of question answerability?	Allwood et al	University of Gothenburg
Volatility versus the number and amplitude of gains/losses – Introducing natural frequencies as a risk measure for equity funds	Almqvist&Andersson	Stockholm School of Economics
Lawyer and Non-Lawyer Susceptibility to Framing Effects	Belton et al	Middlesex University
Small-scale meta-analysis of Unconscious Thought Advantages in three Slovak samples	Cavojova et al	Institute of Experimental Psychology, Slovak Academy of Sciences
Psychological dynamics in microeconomics: Self-regulation, social distance, and individual difference	Kobbeltvedt	Norwegian School of Economics
Birth order, Risk and Time preferences and Overconfidence	Detlefsen	University of Kiel

Predicting the Reception of Scientific Evidence: The Role of Scientific Reasoning Ability	Drummond&Fischhoff	Carnegie Mellon University
Probability is in the eye of the beholder: Individual differences in risk attitude	Dudekova et al	Institute of Experimental Psychology, Slovak Academy of Sciences
Experienced ambiguity is not ambiguous? Incorporation of missing information into sampling paradigm for decisions under ambiguity	Guney	University of Southern California
Uncertainty in the real world. Which strategies do paramedics use?	Harencarova&Kostovicova	Institute of Experimental Psychology, Slovak Academy of Sciences
Does Sequential or Simultaneous Presentation of Value and Probability Affect the Information Integration in Risky Prospects?	Guath et al	Department of Psychology, Uppsala University
Learning from threshold events	Keck et al	University of Vienna
Eyes on the price: Information processing and Lower Bid Bias	Leib et al	Ben-Gurion University of the Negev
Risk-attitudes meet process-tracing: Informational cues relate to risk-attitudes in ten different domains	Jarecki&Wilke	Max Planck Institute for Human Development
What to tell? Wise Communication and Wise Crowd	Liu&Li	Erasmus University Rotterdam
Connecting financial literacy and planning with food hardship among children	Loibl	Leeds University Business School and Ohio State University
No Link Between Attentional Drift and Item Value in the Diffusion Model of Choice	Mullett&Stewart	University of Warwick
Meeting the challenge of designing graphs that promote both risk understanding and behavior change	Okan et al	Leeds University Business School
You are special but it doesn't matter if you are a greenhorn: Social recommender strategies for mere mortals.	P. Analytis et al	Max Planck Institute for Human Development
Multilevel learning in hierarchical organizations	Knudsen et al	University of Southern Denmark
Fess up or chip in: Confession or donations as means for self-exoneration following unethical behavior	Peer	Bar-Ilan University
Strategy selection learning and categorization of environments	Stojic	Pompeu Fabra University
Learning the cue weights in decision making models	Stojic&Olsson	Pompeu Fabra University
Incentive and Emotion in environmental decision making	Taylor&Summers	University of Leeds
Effects of Instructions and Working Memory Load on the use of the recognition heuristic	Thoma	University of East London
Affective forecasting errors and context effects in happiness judgments about health states	Walasek	University of Warwick
Risk-taking, perceived risks, and perceived benefits across adolescence: A domain-specific risk-return approach	van Duijvenvoorde et al	Leiden University
Angry Women are More Trusting: A Mediation Analysis of Anger, Trust, and Social Distance	Zhang et al	University of Konstanz
Organ waiting time, long or short? How abstraction affects organ allocation preference	Li	University of Colorado Denver
